

### Quilting or Betweens

Specifically designed for quilters, the short length of these needles allows you to stitch far faster than when using an ordinary needle.

### Tapestry

These large eye needles allow the user to thread tapestry wool or six-strand cotton, while the blunt end enables the needle to pass through canvas without tearing it.

### Chenille

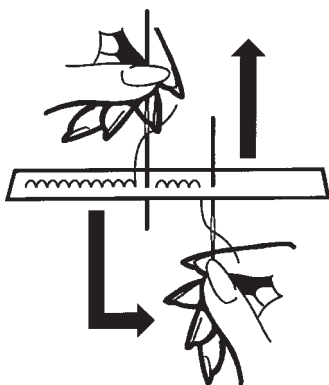

These needles are identical to tapestry needles except that they have a sharp point which will pass through coarse fabrics.

### Darners

As the name suggests, these are used for darning work. Sizes 14-18 are known as yarn darners.

### Double-Ended or Twin Point

Rounded tapestry points on both ends with one long & narrow eye in the center. No needle turning & less needle dropping. Great for Needlepoint & Cross-Stitch.

### Curved

These needles are great for instant up needle basting or tying.

### Beading

Long & thin, specially made to thread beads & pearls.

### Trapunto

6" long, 15 gauge blunt pointed needle for elegant sculptured quilting fast & easy.

### Sharps

These are general sewing needles used by dressmakers around the world. Sizes 16-18 are known as carpet sharps and, as the name suggests, are used in the design of carpets & rugs.

### Milliners or Straw

Although traditionally used in the millinery trade, they are now more commonly used for pleating and fancy decorative stitches. They are similar to an ordinary sewing needle except that they are longer.

### Embroidery or Crewel

These needles have a longer eye which makes them ideal for threading stranded cotton. Apart from this, they are the same in length and point as an ordinary sewing needle.

### Long Darners

Another form of darning needle, the extra length and large eyes make these suitable for mending with wool.

### Sashico

These needles are specially designed for Japanese Quilting
