

Idea: Substitute drawing two of the small Scallops in place of centering the large Scallop guide! Draw the Scallop line. Continue from right-hand edge of the second dart to the left-hand edge of its neighboring dart, and so on until your new edge is created around the entire vase. Now, rather than cutting on the outer circle, cut out the new Scalloped edge you have marked. You may leave your inner dashed circle as is, or match your new Scalloped edge by using the smaller Scallop slot to modify the inner hexagon by drawing a Scallop to cut on the modified Scalloped edge(s) rather than the outer circle guide line and/or inner hexagon.

Hints:

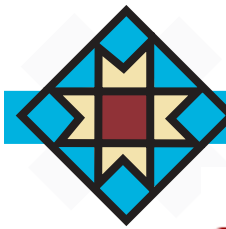

Try experimenting on paper before you use your fabric.
 Try various combinations of edge guides to change the look of your vase.

Instructions

**Quilter's Rule
 Vase Maker**

the newest fabric object template

Supplies Needed:

- Quilter's Rule Vase Maker
- One 13" x 13" square of Stiff Stuff
- Two 13" x 13" squares of a Fusible Web
- Two 13" x 13" squares of Fabric
- Thread
- Scissors
- Marking tools (recommend fine point Sharpie)
- Iron
- Sharps machine needles, size 12

Basic Vase Instructions

1. Fuse the fusible to the “wrong” side of your fabric squares. Follow the directions for your fusible web. Remove the backing of your fusible and fuse one fabric square to each side of the square of Stiff Stuff.
2. Place Quilter’s Rule Vase Maker on the inside fabric. Trace the “petals”.
3. Cut around the petals (unless you wish to modify the edge ... see Using the Edge Guides)
4. Connect the points found at the bottom of the “V”s to create a base.
5. Set your sewing machine to medium width satin stitch or to a width that pleases you. Center your foot on the inner hexagon and stitch completely around the inner hexagon.
6. Stitch your darts together by folding the vase and lining up the edge then cast the satin stitch over the edge. This will create a “rib” on the vase. The vase is reversible.
7. Satin stitch the outer edge of the vase. To get a “piping” look to the outer edge, use a narrower satin stitch and stitch around the edge twice. Verigated threads are really good here!!
8. Optional - You can “quilt” the sides of your bowl by adding decorative stitching.

Advanced Vase Designs:

Using the Edge Guides:

After you trace the Quilter’s Rule Vase Maker onto your fabric choose an alternate edge.

Peaks & Valleys Vase

Center the Peaks & Valleys guide between the right-hand edge of a dart to the left-hand edge of the clockwise neighboring dart. Draw the Peak or Valley line. Continue from right-hand edge of the second dart to the left-hand edge of its neighboring dart, and so on until your new edge is created around the entire vase. **Fun Idea: Alternate Peaks and Valleys for a really wild-edged vase!** Now, rather than cutting on the outer circle, cut out the new Jagged edge you have marked. You may leave your inner hexagon as is, or match your new Jagged edge by using the Peaks & Valley slot to modify the inner dashed circle by drawing a Peak or Valley between the base of each “V” of the Open Darts. Refer to Basic Vase Instructions - Steps 4 - 8 to complete your vase, remembering to cut on the modified Jagged edge(s) rather than the

outer circle line and/or inner hexagon.

Scalloped Vases

Center the large Scallop guide between the right-hand edge of a dart to the left-hand edge of the clockwise neighboring dart. **Fun**
